Rough Draft for Your D.A.R.E. Report

What I learned from D.A.R.E is to stay away from drugs and bad influences. Drugs like meth and alcahol are very dangerous to the human body. Smoking can have many affects on the human body and the human brain. Bullying happens almost everywhere in the world. Every 7 seconds someone is being bullied. One other thing that we learned about was communicating very effectively. One way to do this is to make eye contact and use a confident tone. We also learned sometimes you have to give yourself a pause button, and when you need to think something over just reach up and push it. We also learned about resistance strategies and thought of how we could avoid situations. D.A.R.E was very fun and exiting.
