DARE REPORT

Almost 50,000 deaths per year can be attributed to secondhand smoke. My dare teacher taught us all kinds of things in this report im going to be talking about why not to do drugs, why to make good choices, and why to have responsibility.

Here are resons why not to do drugs. Drugs slow down your brain and that can lead to seizures. Also drugs make you lose self-control. Drugs also make you have memory loss and make you have poor choi

Now here are reasons why to make good choices. here are bad choices you can make. One bad choice is doing drugs. And also a bad choice is drinking alcohol.

Being responsible for your actions is very important. I learned being responsible is not always easy. The best way is to choice the right friends and also help them make good choices. I want to be that kind of friend.
